

Fullscript connects with your EHR

Fullscript easily integrates with the EHR you're used to using on Welleivate. Once you migrate to Fullscript, you'll be able to easily find your EHR in our Integrations Marketplace and continue supporting your patients without disruption.

BodySite is a cloud-based lifestyle guidance web app that allows practitioners to enroll patients into lifestyle and care programs. [Learn more](#)

ChARMHealth is a practice management and patient engagement platform with telehealth, revenue management, and medical billing solutions. [Learn more](#)

Cerbo is a HIPAA-compliant EHR, practice management system, and patient portal, made specifically for functional and direct pay or cash-based practices. [Learn more](#)

OptiMantra empowers practitioners to leverage the same platform and collaborate effectively in multi-disciplinary, multi-practitioner group settings. [Learn more](#)

Practice Better is the complete nutrition practice management software for health and wellness professionals. [Learn more](#)

Once you migrate, here's how to connect your Fullscript account to your EHR:

- 1 Sign in to Fullscript and navigate to your account menu.
- 2 Select "Integrations" in the drop-down list to be taken to Fullscript's Integrations Marketplace.
- 3 In the Marketplace, find the EHR you want to connect to and click "Learn more" to explore the Fullscript integration.
- 4 Click "Get started now" to sign in to your EHR and connect to your Fullscript account.

A whole suite to support your practice and patients

Fullscript offers a wide range of integration partners to optimize your practice and support your patients' wellness journeys, as well as other important benefits:

Streamlined workflow

Stop duplicating information (and work) on the platforms you rely on.

Personalized patient care

Seamlessly tailor care with simplified access to powerful data and tools.

More revenue to grow your practice

Practitioners yield 16% more revenue on average with an integration.

Improved visibility and adherence

Manage patient progress better with all their info tracked in one safe place.
