

# Whole person care is better together

The Fullscript app is built to help you stay on track.

No one plans on going off plan, but a little support along the way can make all the difference.

Fullscript is designed to help you feel more connected to your provider throughout your wellness journey. Tools like currently taking, dose reminders, and a personalized layout keep you on plan and put better outcomes within reach.

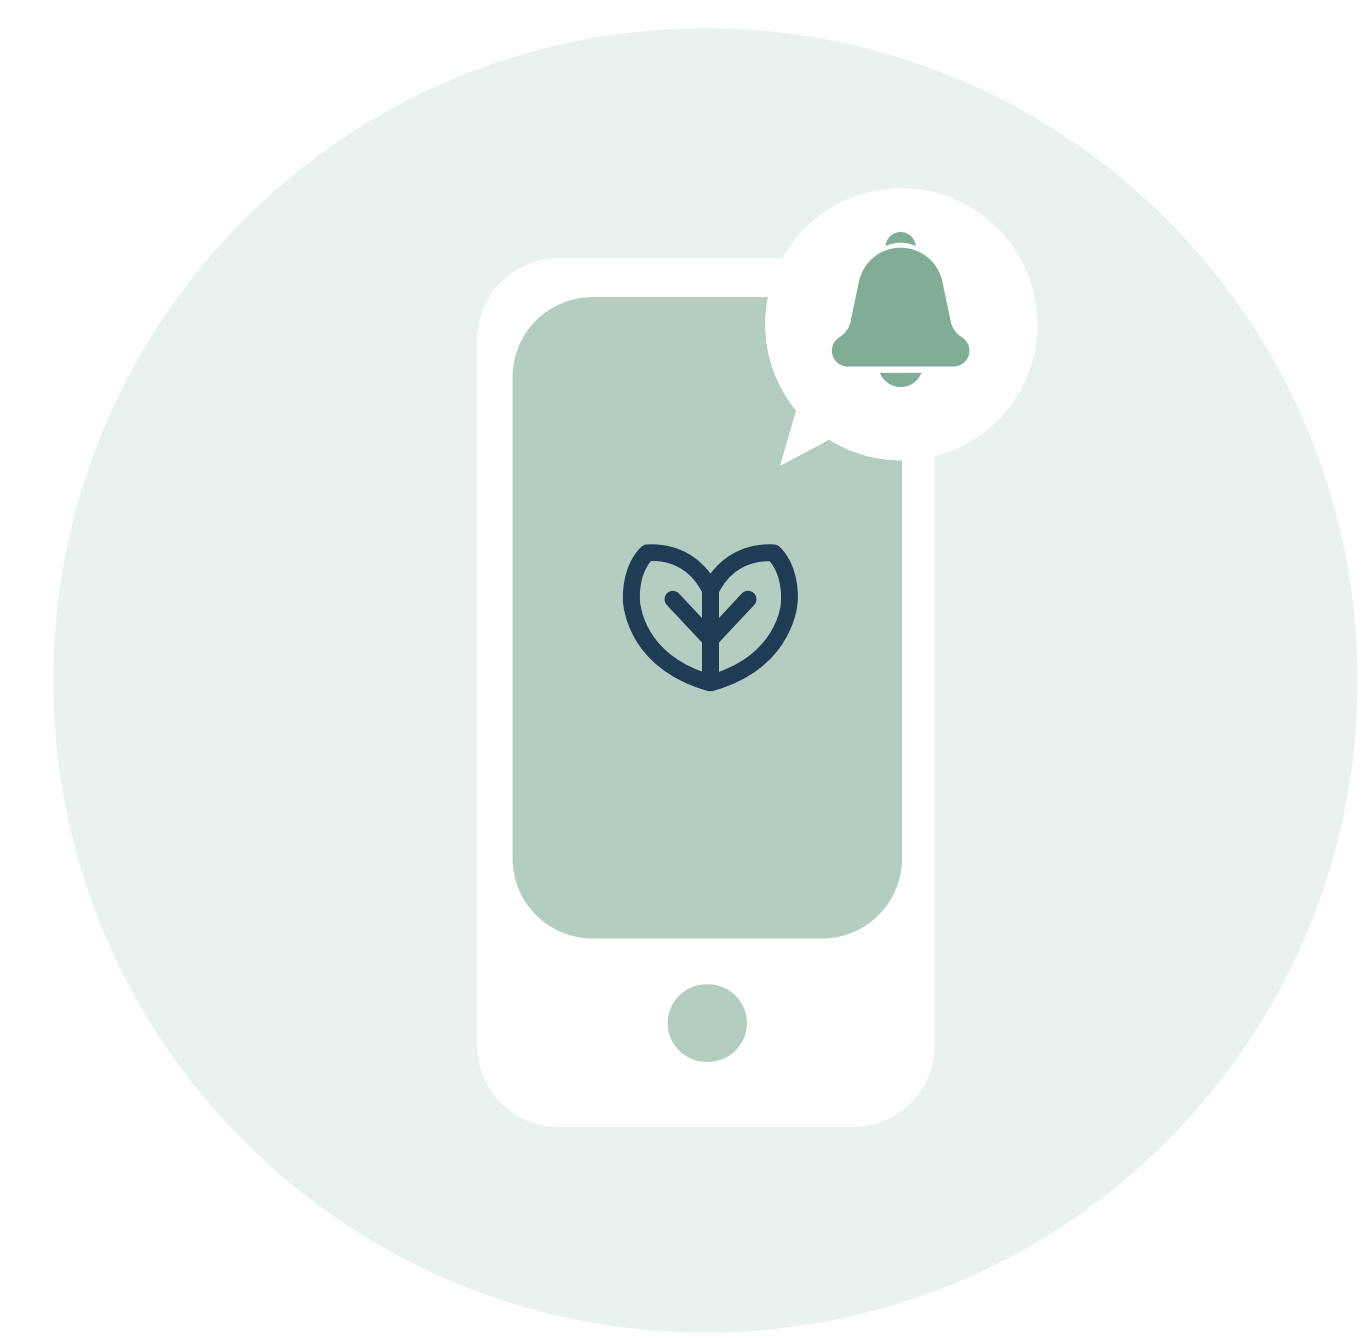

## Your plan in one place

Access provider recommendations, order high-quality supplements, and stay on track with your supplement and medication doses in one app.

## Products you can trust

Fullscript only offers the highest-quality supplements and leading brands – inspected, stored, and shipped with quality controls few retailers can match.

## Your partner in health

With all the tools you need to stay on plan - currently taking, dose reminders, and auto refills - it's easier to keep health a top priority when life gets busy.

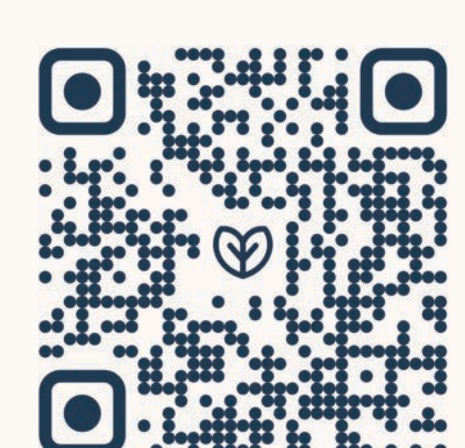

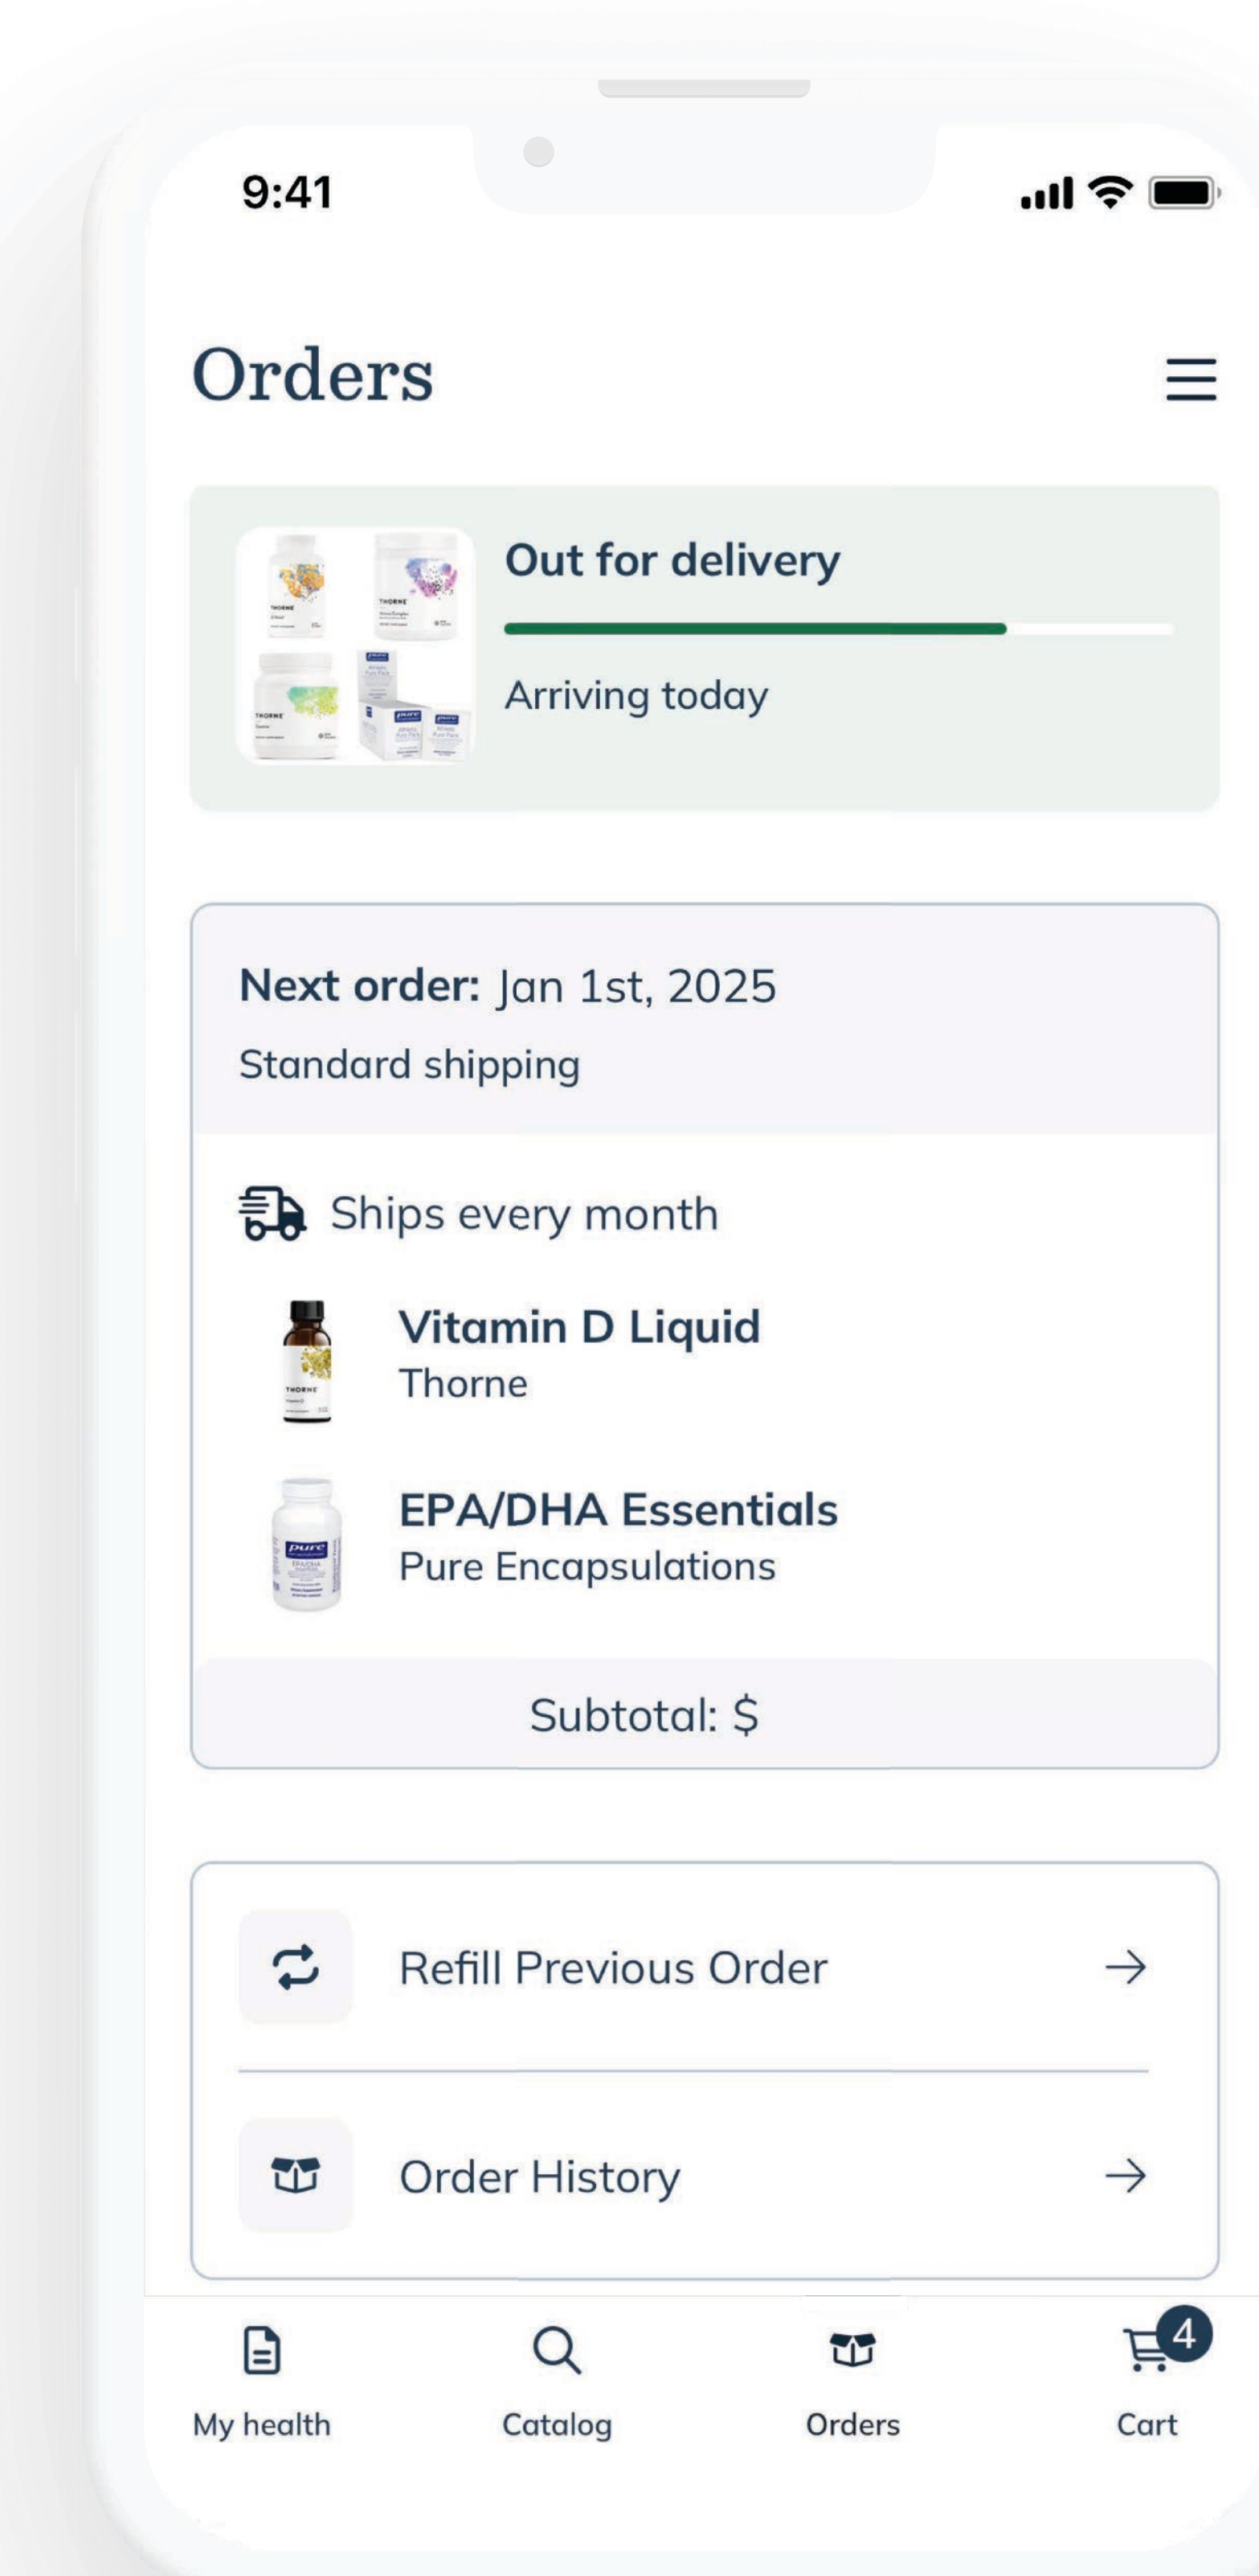

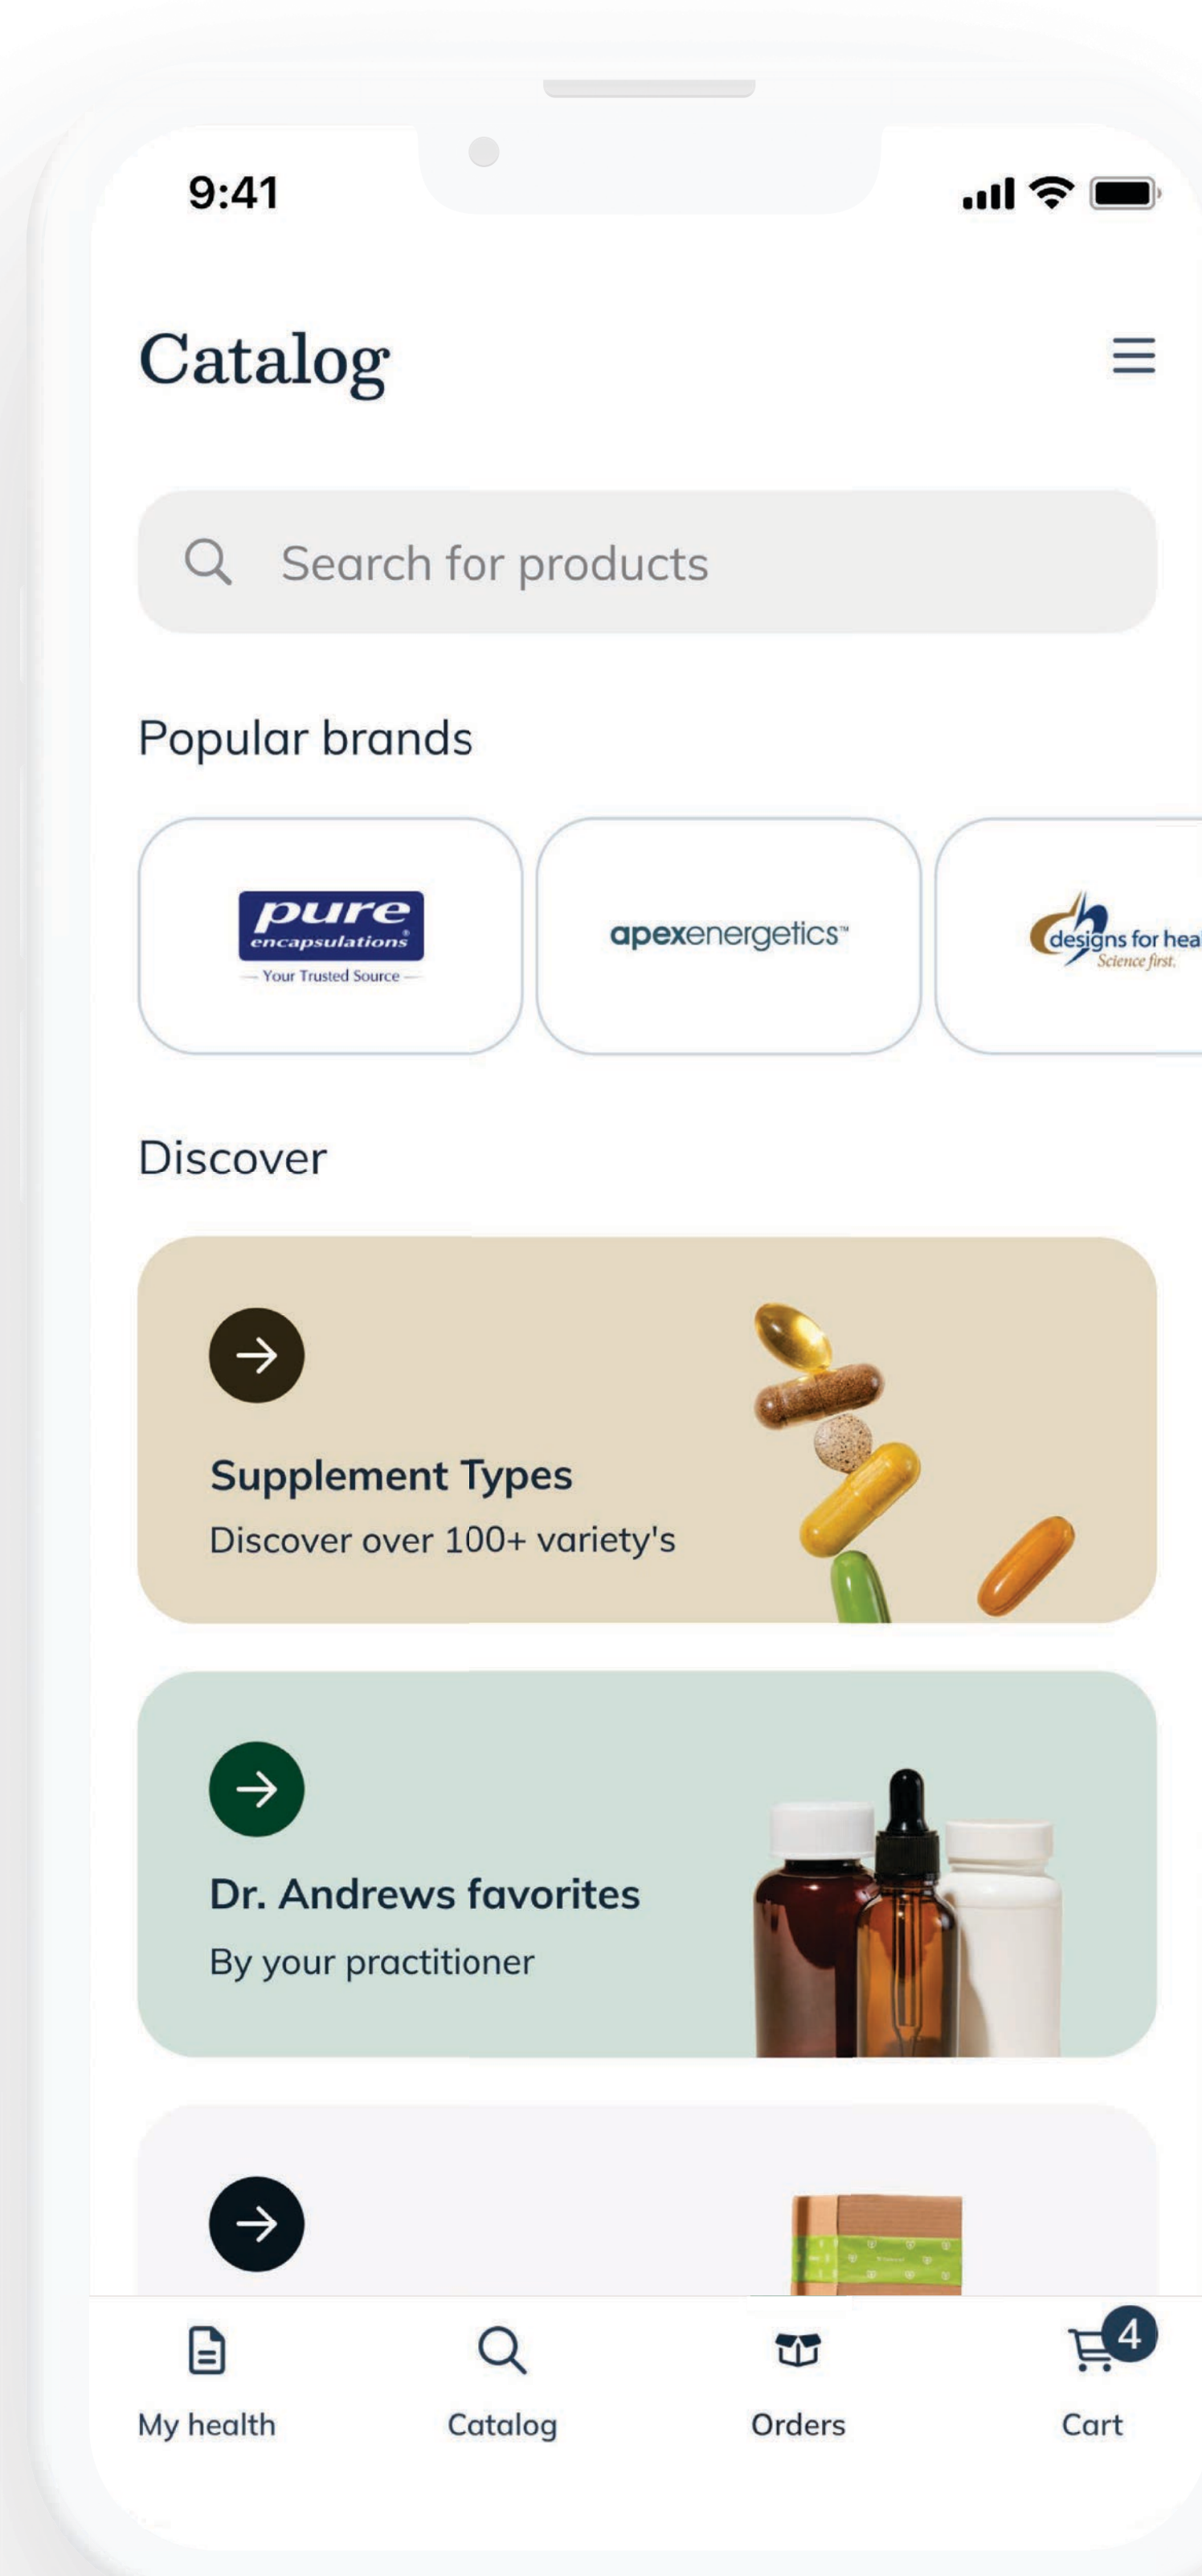

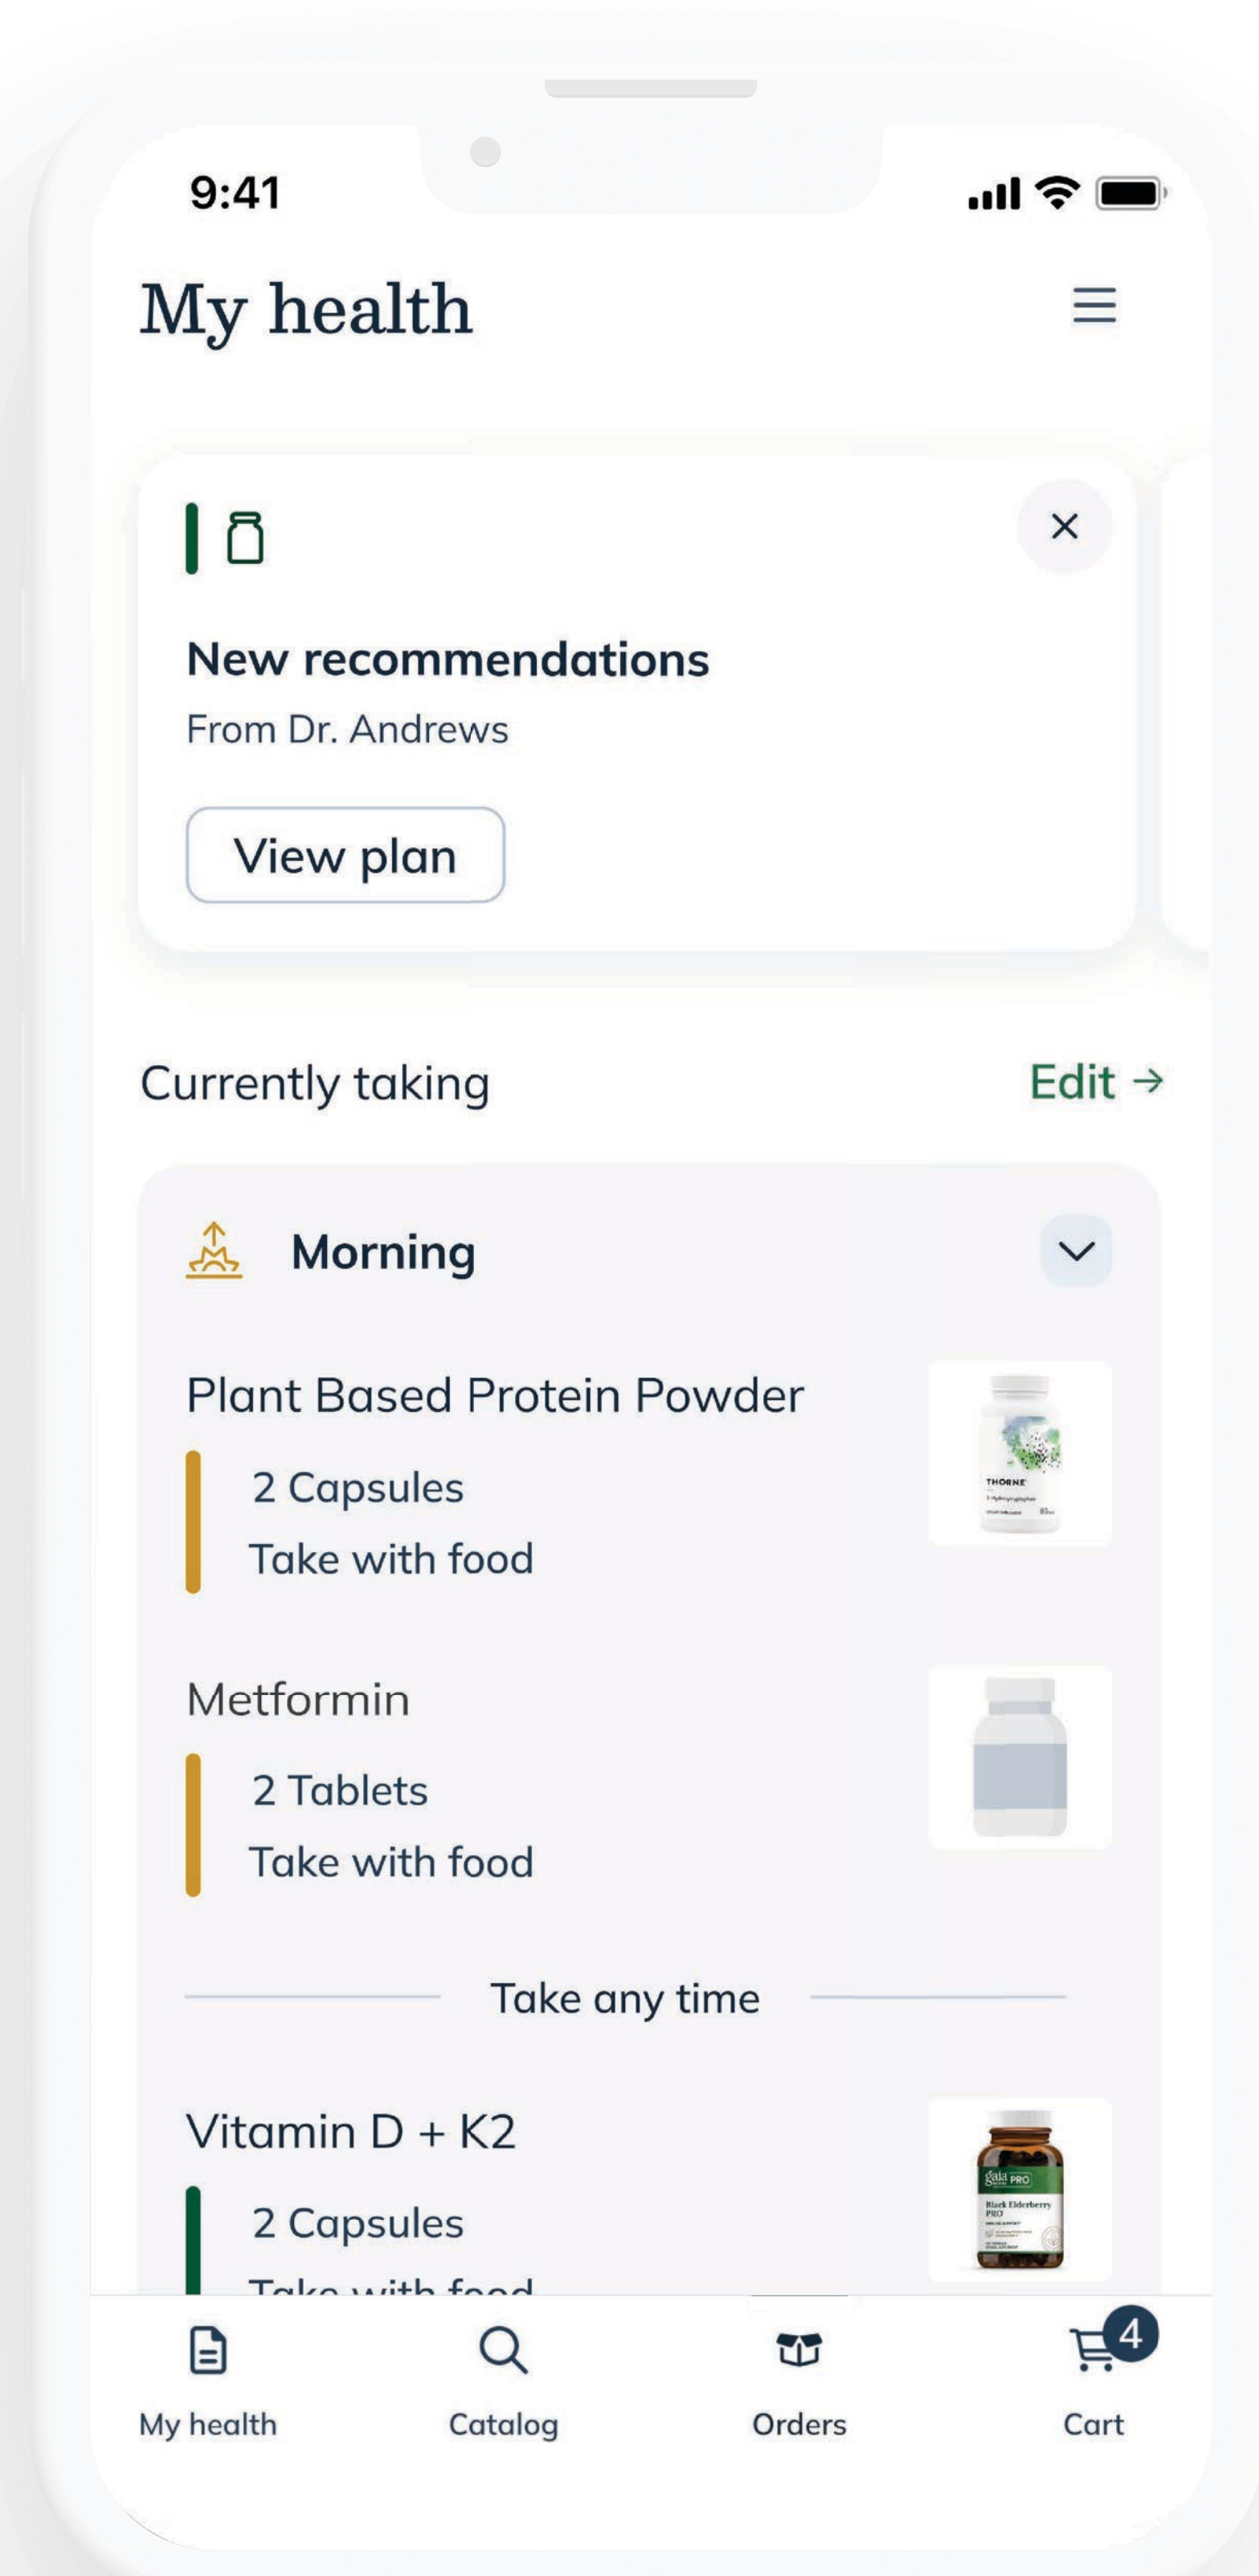

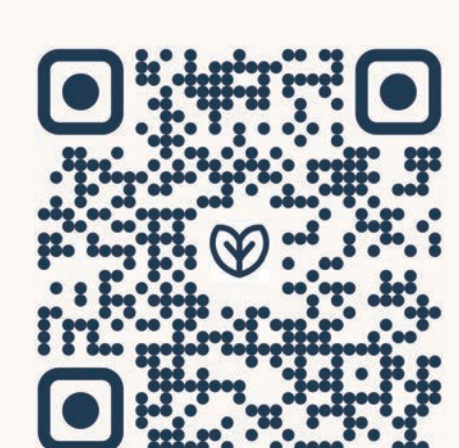

# A healthier reason to check your phone

Download the Fullscript app — available on Android and iOS.

The Fullscript patient app takes the work and worry out of managing your daily supplement and medication routine with dose reminders, refill alerts, and access to a catalog of the most trusted supplement brands and health products.
