

A seamless migration experience for your patients

Ensuring that your patients continue to easily follow your recommendations and access healthcare's best supplements is our priority. That's why we've made it fast, easy, and secure for them to transfer their Wellevate account to Fullscript.

Here's what your patients can expect

Consolidated treatment plans

All treatment plan and order history information from Wellevate will be migrated to Fullscript, so your patients can continue to follow their plans without missing a beat.

A world-class patient mobile app

Fullscript has launched an iOS mobile app in the US Apple app store making it easier for your patients to get the supplements you recommend anywhere, anytime.

An upgraded refill tool

Fullscript offers Autoship! It's just like Wellevate's Auto-Refill program with added benefits and more customization. We'll help any patients who had Auto-Refill on Wellevate get set up with Autoship so they can stay on track with their recurring orders.

A personalized onboarding experience

We'll share with each patient clear steps and support to help them learn how to navigate their Fullscript account.

Check out some examples of emails we're sending to patients to help them sync their accounts and get onboarded to Fullscript:

- **Announcement:** Lets your patients know it's time to migrate to Fullscript
- **Reminder:** Reminds your patients to move their account to Fullscript
- **Completion:** Confirms that they have successfully migrated to Fullscript
