

An overview of Fullscript Daily Packs

Why should I recommend Fullscript Daily Packs?

Fullscript Daily Packs deliver 30 days' worth of high-quality supplements that support your patients' wellness routines, leading to increased adherence. You can recommend two types based on what you feel fits best with your patients' wellness journey. Ready-made daily packs are curated by the Fullscript Integrative Medical Advisory Team, and customized daily packs are tailored to your patients' individual needs.

Can I change which supplements are in the customized daily packs?

Yes, you can curate both day and night customized daily pack packets and boxes (including dosage amounts), accessing Fullscript's [catalog](#) of dozens of brands and products, which is continually expanding as we add more options through the year.

Can my patients change which supplements are in the customized daily pack packets or box?

At this time, patients can only self-serve the ready-made daily packs. They cannot create their own customized daily packs. You will need to create them as part of your patients' treatment plans.

What conditions do the supplements in Fullscript Daily Packs support?

Fullscript Daily Packs address such common conditions as:

- Adrenal and stress
- Blood pressure maintenance
- Immunity
- Sleep
- Digestive health
- Blood sugar
- Joint
- Cholesterol
- Everyday health needs

Three ways patients can access Fullscript Daily Packs

1:1 plans

Add daily packs to your recommendations like any other product.

Shareable protocols

Create and send daily packs protocols to select or all patients from the “Protocols” page.

Catalog banner

A daily packs banner will be in the catalog for patients who have permission to self-serve.*
