Logo placement

Place a separator line one 'C' space away from the Fullscript logo, and the same space distance to the partner logo.

The graphic elements and overall shape of partner logos will vary greatly. Use these placement examples as a guide. The partner logo should appear optically balanced, while respecting the minimum distance specified.

For all materials, where the fullscript message, and brand are used, the Fullscript logo must appear before the partner logo. This includes any and all materials created specifically by Fullscript.
